MOHAMMAD KAIF ALI ANSARI

Jamshedpur, Jharkhand | +91 8797740415 | kaifi3110@gmail.com | porfolio-alpha-six-c06soq9ha0.vercel.app

PROFESSIONAL SUMMARY

Computer Science undergraduate at Jamia Hamdard (CGPA: 7.9, graduating 2027) with deep expertise in software development and generative AI. Proven ability to build end-to-end applications using Python, FastAPI, RAG, Node.js, and MySQL. Builded veriqo, an AI-powered misinformation verification tool combining retrieval-augmented generation with real-time web search. Backed by hands-on data analytics internship experience.

EDUCATION

B.Tech, Computer Science & Engineering — **Expected 2027**
Jamia Hamdard, New Delhi — CGPA: 7.9

Class XII — **2023**
Church School, Beldih — 80%

Class X — **2021**
Church School, Beldih — 85%

INTERNSHIP

Data Analytics Intern | Edunet Foundation, VOIS for Tech Program — **Aug 2026 – Sep 2026**

- Analyzed HR, agriculture, and business/operations datasets using Python, cleaning data and surfacing trends through data visualizations.
- Built an independent analytics project end to end under mentor guidance, from problem framing to visual insights.
- Selected for a competitive 4-week, project-based program; attended technical learning sessions on analytics tooling.

PROJECTS

Veriqo: AI-Powered Misinformation Verification Tool — veriquo.vercel.app

- Built a web tool that evaluates user-submitted claims and returns a true, false, or uncertain verdict with an explanation and supporting sources.
- Designed an evidence-based pipeline combining RAG, a ChromaDB evidence store, live web search via the Tavily API, and Groq API for AI analysis.
- Developed a FastAPI backend with an HTML/CSS/JavaScript frontend, deployed on Vercel; extending it to verify YouTube videos using transcripts as evidence.
- **Tech Stack:** Python, FastAPI, ChromaDB, Groq API, Tavily API, RAG, HTML, CSS, JavaScript, Vercel

Food Bridge: Food Donation Management System

- Built a full-stack platform connecting food donors with NGOs to coordinate food donations and reduce waste.
- Implemented role-based dashboards for donors and NGOs, plus notifications and a ratings system to improve trust and usability.
- **Tech Stack:** HTML, CSS, JavaScript, Node.js, Express.js, MySQL

TECHNICAL SKILLS

Programming: Java, C, Python

Core CS: Data Structures & Algorithms, DBMS, Operating Systems

Web & Databases: HTML, CSS, JavaScript, Node.js, Express.js, SQL, MySQL

AI & Data: Generative AI, LLMs, RAG, ChromaDB, FastAPI, API integration, data visualization

CERTIFICATIONS & PARTICIPATION

- **Generative AI | Tutedude:** AI fundamentals, prompt engineering, and LLM applications
- **GenAI-Powered Data Analytics Job Simulation | Forage:** EDA, risk profiling, and predictive analytics
- **Hacktoberfest:** Open Source and Engineers | Microsoft Learn Student Ambassadors: open-source collaboration practices
